Application Requirement Study, Application and Database Design, Development, Testing and Implementation. Responsible for set-up of Development, UAT and Production environments.

Consultancy fee Rs.50, 000/- per month.

3. System Architect (1 Post)

First Class Regular B.E. / B.Tech / MCA in recognized University with Minimum 8 years of experience in the IT industry and into application/system software architecture, design, and development, With 2 years of experience as team leader. Should have experience in designing and maintaining large standalone / client-server based / centralized and / or complex distributed systems. Required skills include ability to perform in-depth analysis of the requirements specifications, modeling the solution with a right choice of tools and technologies in the enterprise software arena, formulating the system & life-cycle specification documents, and module level break-ups of the proposed solutions. Must be strong in design and modeling approaches with OOAD, Service Oriented Design approach, UML modeling techniques, Database design and refinement. Development experience in Java / J2EE, Web technologies, XML, JSP and SOAP / other protocols and implementing knowledge of at least an interface is a must. Knowledge of OS concepts / internals and experience in system-level programming are required.

Responsibilities: Interactions with all stakeholders of the project. Providing technical insight and guidance in Application design. Should provide a vision and roadmap to the team about the product / application. Architect and propose solutions for distributed systems (3 - tier / n – tier and Web based applications) involving large volumes of data, and simultaneous access of services by large number of users. Should be able to work as an individual contributor requiring minimal / no guidance.

Consultancy fee Rs.50,000/- per month.

4. System Analyst (1 Post)

Qualification & Experience: First Class Regular BE/B Tech in recognized University with 6 years of experience in Systems and Database Management and should have basic web programming skills, basic HTML, Javascript, JSP, experience in Unix or Linux, Shell scripting. Experience in Systems and Database Management, Basic Web Programming Skills, Basic HTML, JavaScript, JSP, Unix or Linux, Shell scripting

Responsibilities: Maintenance of Oracle Database server, Set-up of Development / UAT / Production DB environments, DB Backup and Recovery. Review Application DB design, Trouble shooting, DB Management & DB Performance improvement, Maintenance of Application servers (running on Linux OS & Windows). Monitor & Performance improvements of servers. Network Management, Security Management, Web server Management & Hosting Website.

Consultancy fee Rs. 45,000/- per month.

5. Senior Programmer (1 Post)

First Class Regular B.E. / B.Tech / MCA in recognized University with Minimum 5 years of experience in the IT industry and into application software design, development and

implementation. Should have experience in implementing large Object Oriented and Service Oriented systems and frameworks. Thorough exposure to various tools involved in the entire life cycle of Object Oriented and Web Applications, and hands-on experience in using the tools for design and development. Experience in participating and conducting technical reviews, mentoring team members, trouble shooting day-to-day issues faced by developers in the team and should have debugging skills in at least one IDE. Should be experienced in implementing SDLC phases and a service oriented mindset for application development is an advantage. Development experience in Java / J2EE, Web technologies, XML, JSP is a must.

Responsibilities: Designing and developing and maintenance of applications for large-scale distributed systems (3 - tier / n – tier and Web based applications) testing test case & code review. Suggest and implement solutions which should be scalable, feasible, cost-effective and maintainable. Should have a mindset to work under an environment where tools / applications from Open source are highly encouraged.

Consultancy fee Rs.30,000/- per month.

6. Senior Programmer – Testing (1 Post)

First Class Regular B.E. / B.Tech / MCA in recognized University with Minimum 5 years in the IT industry and into application testing domain. Must have experience in various testing methodologies and techniques, tools (installation, configuration and usage), and hands-on experience in using the tools for test case development and must be experienced in designing test strategies. Must be experienced in various types of testing including black-box, white-box, functional, negative, positive, regression, integration, performance, load, acceptance, compatibility (OS/browser/hardware/backward/version) and system. Experience in participating technical test case / code reviews, mentoring team members on test case development, trouble shooting day-to-day issues faced by testers in the team and should have scripting skills. Should be familiar with all the phases of Software Test life cycle and a service oriented mindset for application testing is an advantage. Testing experience in testing at least two tools like WinRunner / Load Runner / XStudio/ Robot/ Anteater / jWebUnit / JUnit / Marathon / JFunct. Knowledge of OS concepts / internals is desired. Application development experience in JAVA / J2EEE Web technologies, XML, JSP.

Responsibilities: Testing applications for large-scale distributed systems (3 - tier / n – tier and Web based applications) involving large volumes of data. Suggest and develop different test strategies that thoroughly test a product / application / system and contribute towards a quality product in a timely manner which is cost-effective. Work closely with a team and resolve day-to-day technical issues faced by team members. Optimization of test cases, review of test cases and participation in various reviews across all phases of product life cycle and key areas of work. Keeping in touch with latest technological developments relevant to the work and suggesting cost-effective tools for implementing the same, get involved in other activities which could arise in day-to-day work or on need basis. Should have a mindset to work under an environment where tools / applications from Open source are highly encouraged. Should be able to guide a small team technically.

Consultancy fee Rs.30,000/- per month.

7. User Interface Developer (1 Post)

Qualification & Experience: Graduate/Post Graduate in Computer Science/Computer Applications from a recognized university – Regular courses only. Minimum 2 years in the IT industry and into application software development and implementation. Should have experience in development of Graphical User Interface tools, and hands-on experience in installation, configuration and usage knowledge of tools for development of UI. Development experience in Java / J2EE, Swing and / or any Web-site designer tool is a must. Prior experience in Open source based UI designing tools is a definitive advantage. Should be well versed with basic web page/layout designing skills and guidelines.

Responsibilities: Prototype development and assist development team in design for home page, menus, and data capture screens & reports. Should have a mindset for developing end-user friendly and appealing screens.

Consultancy fee Rs.25, 000/- per month.

8. Statistical Officer (1 Post)

Qualification and Experience: M.sc Statistics/ M.sc Mathematics from a reputed institute – regular courses only with 3 years of experience in statistical data management. Proven capacity to use computerized office tools MS-Office, MS Projects. Experience in Statistical Data Management.

Responsibilities: Collecting, updating, and analyzing information and statistics. Compilation of statistical data and creation of reports and analysis of data trends for senior management team.

Consultancy fee Rs. 20,000/- per month.

9. Software Developers (3 Post)

Qualification and Experience: First Class Regular B.E. / B.Tech / MCA in recognized University. For B.E/ B.Tech with 2 years and for MCA with 3yrs of hands on recent experience in JDK/JSP/Struts/Hibernate/CSS and J2EE related technologies, exposure to Drupal & PHP is an added advantage. Good Knowledge of Oracle database and capable of using any other open source Database.

Responsibilities: Development of web-based applications using J2EE related technologies. Deployment of the applications to test and production environment. Technical Support of the applications developed.

Consultancy fee Rs. 25,000/- per month.

10. Manager: (1 Post)

Qualification & Experience: Graduate with Diploma in secretarial practice/Diploma in office manager's course with oral and written communication skills both in Kannada and English with computer knowledge and 3 to 5 years relevant experience in Team Lead/Manager.
Responsibilities: To handle all administrative issues related to KMDS.

Consultancy fee Rs.16, 000/-per month

11. Accountant (1Post)

Qualification and Experience: Ist Class B.com with accountancy and commerce as major subject well versed in latest tally version. He/She must have 2 years of work experience in the Accounting/Auditing in a Registered Firm/Public Sector/Government Establishments. Knowledge of Income Tax, VAT and Service Tax matters is desirable. Computer knowledge is a must.

Consultancy fee Rs. 12,000/- per month.

12. Group 'D" (1 Post)

Qualification and Experience : S.S.L.C pass with Kannada as a language. Experience in attending all office work in general.

Consultancy fee Rs. 6,900/- per month.
